DENOMINATION

WINE APPELLATION: Vino Spumante di Qualità

VINIFICATION

After destemming, the grapes are transferred to the press without being crushed. From the pressed grape we obtain free run must, which is the most precious part of the juice. The first fermentation takes place in temperature-controlled stainless steel tanks, followed by approximately nine months of aging before bottling. The second fermentation occurs in the bottle, followed by at least 70 months of aging on the lees. Remuage is carried out manually.
